SUMMARY

Driven by a passion for creating efficient and scalable web applications, I bring three years of hands-on experience in the MERN stack and Backend with Laravel. My proficiency encompasses all stages of web development, from initial concept to deployment and maintenance. Adept at managing project timelines and collaborating with cross-functional teams, I excel in delivering high-quality solutions on time. With strong problem-solving abilities and a track record of both independent and team-oriented work, I am committed to contributing to the success of any project I undertake.

KEY SKILLS

-Proficient in MERN Stack
-Experience with RESTful APIs
-Experience With Laravel

-Ability to work independently and collaboratively in a team .
-Excellent communication skills

-Strong problem-solving and debugging skills
-Familiar with Git

PROFESSIONAL EXPERIENCE

Final Year Project: Agricultural Market Integration Platform

-Developed a comprehensive platform to bridge farmers with buyers and logistics providers.
-Empowered farmers to locate buyers for their produce and streamline shipping coordination.
-Leveraged MongoDB, Express.js, React.js, and Node.js to create a cohesive and efficient application.
-Implemented robust security measures to ensure the safe handling of transactions and user data.
-Enhanced market access and operational efficiency for farmers throughout Ethiopia.

Support(Help) Desk

The Support Desk acts as the first point of contact, facilitating seamless communication between the client and the company. It ensures that clients can promptly report their problems, receive timely assistance, and have their concerns addressed efficiently. By providing a dedicated platform for issue resolution, the Support Desk enhances client satisfaction and trust, ultimately contributing to the stability and reliability of the company's systems and services
